Review-1-**10 Marks: Problem Identification & Proposal**

Criterion	Marks
Problem identification & motivation	2
Literature survey & research gap	2
Objectives & expected outcomes	2
Proposed Soft Computing methodology	2
Initial idea for Article / Patent / Startup Proposal	**1**
Presentation & Viva	1
Total	**10**

You must clearly establish **what problem they are solving, why it is important, existing approaches, and what Soft Computing technique they propose to use.**

Students should indicate the potential outcome of their project:

- Research paper/article
- Patent/IPR
- Startup/product proposal
- Technical prototype

Review II – 30 Marks: Design & Implementation

Criterion	Marks
Literature survey & refinement of research gap	3
Detailed methodology / system design	4
Implementation progress	8
Dataset / data preparation	3
Preliminary results & analysis	4
Article / Patent / Startup Proposal Development	**4**
Presentation & Viva	2
Soft Computing technique justification	2
Total	**30**

At least **50–70% of the implementation** should preferably be completed, with preliminary experimental results.

Outcome	Expected evidence
Research Article	Title, abstract, methodology, preliminary results, target journal/conference
Patent/IPR	Novel idea, inventive aspect, prior-art search, proposed claims
Startup Proposal	Problem, target users, proposed product, USP, market/application

Prototype/Product	Working prototype, application, TRL/proof of concept

Final Review

Criterion	Marks
Problem formulation and achievement of objectives	3
Methodology and technical correctness	4
Complete implementation	8
Experimental evaluation	7
Results, comparison and discussion	5
Application/novelty and effective use of Soft Computing	5
Presentation and demonstration	3
Viva-voce	5
Total	**40**

A **fully functional project**, with proper experiments, results, comparison/baselines, conclusions, and demonstration.

Achievement	Marks
Only idea/concept	1
Draft prepared / proposal developed	2
Submission-ready article / patent draft / startup proposal	3
Submitted article/patent OR well-developed startup/product proposal	4

Project Report 20 Marks

Criterion	Marks
Abstract, Introduction & Problem Definition	2
Literature Survey & Research Gap	3
Proposed Methodology / System Design	3
Implementation	2
Results & Analysis	4
Discussion, Limitations & Future Scope	2
Article / Patent / Startup Proposal Documentation	**2**
References & Citation Quality	1
Organization, Formatting & Presentation	1
Total	**20**
